

Ahmed Ikram | AI Engineering

Dundee, Scotland | +44 7421 996048 | ahmedikram30@gmail.com | [LinkedIn](#) | [GitHub](#) | [Online Portfolio](#)

Final-year BSc Computer Science (Data Science & AI) student at the University of Dundee, on track for a First-Class degree, graduating June 2027. Builds production LLM systems and the evaluation harnesses that prove they work: **RAGAS**-scored retrieval, execution-based **fine-tuning** benchmarks, statistically-gated promotion. An **MCP-served RAG agent** roughly doubles retrieval recall over deterministic tool routing (0.708 vs 0.350). Seeking a graduate **AI Engineering** role, or an adjacent Applied ML / MLOps position.

EDUCATION

University of Dundee - BSc (Hons) Computer Science (Data Science and AI)

Sep 2023 - Present

- On track for a **First-Class Honours** degree, Graduation: **June 2027**

SKILLS

LLMs & Generative AI: PyTorch · Hugging Face Transformers · QLoRA/LoRA/PEFT · TRL · Unsloth · vLLM · Prompt & Context Engineering

AI Systems & Agents: LangGraph · LangChain · Model Context Protocol (MCP) · ChromaDB · Cross-Encoder Reranking · Multimodal (Vision-Language) Extraction · NLP · LLM Guardrails

Evaluation & Observability: RAGAS · Execution-Based & LLM-as-Judge Evaluation · LangSmith · Langfuse

MLOps & Serving: MLflow · Weights & Biases · Airflow · Evidently AI · FastAPI · Modal · AWS SageMaker

Languages: Python · SQL · TypeScript · JavaScript · Bash · Rust

Data & Backend: PostgreSQL · Redis · Kafka · MySQL · MongoDB · Pandas · NumPy · Pydantic

Cloud & Infrastructure: AWS · Google Cloud · Terraform · Docker · GitHub Actions · Linux

PROJECTS

ATM Log Aggregation, Analysis & Diagnostics Platform

LangGraph · MCP · ChromaDB · FastAPI · XGBoost · MLflow · Kafka · Redis · Docker · Terraform · AWS · SageMaker

- ML and Backend lead on a 7-person Agile team for NCR Atleos: Independently built the ML anomaly detection engine, agentic hybrid RAG assistant, AWS infrastructure, and 1,438 test-suite as a post-deadline extension on the team-delivered foundation.
- Hybrid RAG assistant as a LangGraph agent over a 12-tool MCP server, with grounding-gated re-retrieval and 4-signal confidence fusion (retrieval, consistency, verbalised, grounding) behind cross-encoder reranking.
- RAGAS evaluation across 3 retrieval strategies (50-query golden set): adaptive routing with re-retrieval **nearly doubles** context recall over deterministic selection (0.708 vs 0.350) at the best context precision (0.874); a CI gate blocks any merge regressing a RAGAS metric by >0.05.
- 3-layer anomaly detection (XGBoost + Isolation Forest + Z-score) runs every 30s on a live Kafka stream, reaching 0.70 F1 at 97.3% precision via a 200-point threshold sweep, versioned in MLflow and cross-checked against a live SageMaker endpoint.
- Terraform-provisioned AWS (ECS Fargate, RDS, S3, SageMaker, Secrets Manager) vis OIDC-authenticated CI/CD, validated by 1,438 tests across pytest, vitest, Playwright, and Terraform-test.

StockLens FinTech Spending & Investment App

LangGraph · AWS · PyTorch · Optuna · FastAPI · Airflow · MLflow · Evidently AI · Tesseract · PostgreSQL · Redis · Terraform

- 2-node LangGraph ReAct agent (explicit StateGraph, not the create_react_agent wrapper) exposes 16 tools to AWS Bedrock with SSE-streamed responses and dual Redis/PostgreSQL persistence surviving restarts; correctness judged in CI by an LLM-as-judge with 10%-sampled LangSmith tracing.
- Confidence-gated 4-stage receipt-extraction cascade (Tesseract OCR → Vision-LLM → Text fallback) with fuzzy merchant matching, escalating only when confidence drops below thresholds.
- Global LSTM forecaster reaches 51.6% accuracy against a 50% random baseline (0.97 simulated Sharpe), retrained weekly via Airflow with Evidently drift monitoring (PSI/KS/JSD) and MLflow-tracking, champion/challenger promotion gating at >2pp improvement.
- 1,415 tests at a 90% coverage gate on Terraform-provisioned AWS infrastructure (193 resources), 9-parallel-job CI pipeline and a 7-stage OIDC-authenticated CD pipeline

SWE-Qwen Automated LLM Fine Tuning, Evaluation & Serving Platform

Python · PyTorch · QLoRA · Unsloth · Hugging Face · Modal · vLLM · Weights & Biases · Langfuse · Terraform · Google Cloud

- Model-agnostic LLMOps platform spanning schema-validated data preparation, QLoRA fine-tuning, execution-based evaluation and statistically-gated champion/challenger promotion, serving the winner as a config-driven OpenAI compatible API - versioned GCS/W&B artifacts shared across every stage.
- Six-stage data pipeline turned 20,477 raw SWE-bench issues into a leak-free 17,456-example corpus across 46 repos; evaluation materialises each repo in its official Docker image and runs its real pass/fail test suite for ground-truth, execution-based scoring.
- Scored 3 QLoRA Qwen3-14B variants (4-bit NF4, Unsloth + FlashAttention on Modal) with the champion reaching 17.20% fix rate - 7.0× over base model (95% CI 11.1-25.8%, McNemar $p < 1e-6$) at 90.10% unrelated test-pass rate; promotion gated behind a 4-condition statistical test so a challenger can never self-certify a win.
- Deployed on Modal scale-to-zero with per-request LoRA swapping via vLLM+AWQ (\$0 idle cost); GCP-provisioned via Terraform with WIF and 1,456 tests.

EXPERIENCE

Beaully Mini Market, Dundee, Scotland

Retail Assistant

September 2023 - Present

- Diagnosed and resolved Point-of-Sale and stock system failures rapidly to minimise service disruption

Zulus Peri Peri Grill, Dundee, Scotland

Front of House Worker

June 2021 - September 2023

- Trained 5 new staff members; managed competing priorities across dine-in, takeaway, and delivery orders under sustained pressure
